Contents of Vol. 161

Part 1

Editorial 1

RICHARD D. LEAPMAN and S. BRIAN ANDREWS. Analysis of directly frozen macromolecules and tissues in the field-emission STEM 3

R. M. GLAESER, A. ZILKER, M. RADERMACHER, H. E. GAUB, T. HARTMANN and W. BAUMEISTER. Interfacial energies and surface-tension forces involved in the preparation of thin, flat crystals of biological macromolecules for high-resolution electron microscopy 21

JEAN LEPAULT, INGE ERK, GISÈLE NICOLAS and JEAN-LUC RANCK. Time-resolved cryo-electron microscopy of vitrified muscular components 47

NICK D. READ and CHRISTOPHER E. JEFFREE. Low-temperature scanning electron microscopy in biology 59

T. MÜLLER, R. GUGGENHEIM, M. DÜGGELIN and CH. SCHEIDEGGER. Freeze-fracturing for conventional and field-emission low-temperature scanning electron microscopy: the scanning cryo unit SCU 020 73

C. SCHEIDEGGER, M. GÜNTHARDT-GOERG, R. MATYSSEK and P. HATVANI. Low-temperature scanning electron microscopy of birch leaves after exposure to ozone 85

BÄRBEL HARRACH and HORST ROBENEK. Immunocytochemical localization of apolipoprotein A-I using polyclonal antibodies raised against the formaldehyde-modified antigen 97

N. J. SEVERS. Freeze-fracture cytochemistry: a simplified guide and update on developments 109

J. BOONSTRA, P. M. P. VAN BERGEN EN HENEGOUWEN, N. VAN BELZEN, P. J. RIJKEN and A. J. VERKLEIJ. Immunogold labelling in combination with cryoultramicrotomy, freeze-etching, and label-fracture 135

THOMAS VON ZGLINICKI. The measurement of water distribution in frozen specimens 149

PATRICK ECHLIN. Ice crystal damage and radiation effects in relation to microscopy and analysis at low temperatures 159

M. K. LAMVIK. Radiation damage in dry and frozen hydrated organic material 171

Part 2

E. KELLENBERGER. The potential of cryofixation and freeze substitution: observations and theoretical considerations 183

S. A. LIVESEY, A. A. DEL CAMPO, A. W. MCDOWALL and J. T. STASNY. Cryofixation and ultra-low-temperature freeze-drying as a preparative technique for TEM 205

LUDWIG EDELMANN. Freeze-substitution and the preservation of diffusible ions 217

MARGARETHA LINDROTH, BENGT-ARNE FREDRIKSSON and PAUL B. BELL. Cryosputtering—a combined freeze-drying and sputtering method for high-resolution electron microscopy 229

U. JAKUBOWSKI and M. MENDE. Preparation of ultrathin amorphous ice films for cryo-electron microscopy 241

P. M. FREDERIK, M. C. A. STUART, P. H. H. BOMANS, W. M. BUSING, K. N. J. BURGER and A. J. VERKLEIJ. Perspective and limitations of cryo-electron microscopy. From model systems to biological specimens 253

G. LEMBCKE, R. DÜRR, R. HEGERL and W. BAUMEISTER. Image analysis and processing of an imperfect two-dimensional crystal: the surface layer of the archaebacterium *Sulfolobus acidocaldarius* re-investigated 263

J. BRINK and W. CHIU. Contrast analysis of cryo-images of *n*-paraffin recorded at 400 kV out to 2·1 Å resolution 279

DOUGLAS B. WALCERZ and KENNETH R. DILLER. Quantitative light microscopy of combined perfusion and freezing processes 297

CHRISTOPH KÖRBER, SABINE ENGLICH and GÜNTER RAU. Intracellular ice formation: cryomicroscopical observation and calorimetric measurement 313

JAMES B. PAWLEY, PAUL WALTHER, SHIAN-JIUN SHIH and MAREK MALECKI. Early results using high-resolution, low-voltage, low-temperature SEM 327

R. GUGGENHEIM, M. DÜGGELIN, D. MATHYS and C. GRABSKI. Low-temperature SEM for detection of fungicide activity 337

DAVID C. JOY. Contrast in high-resolution scanning electron microscope images 343

KARL ZIEROLD. Cryofixation methods for ion localization in cells by electron probe microanalysis: a review 357

MARGARET C. FOSTER and ALBERT J. SAUBERMANN. Personal-computer-based system for electron beam X-ray microanalysis of biological samples 367

PETER HERTER, GREGOR TRESP, HARTMUT HENTSCHEL, KARL ZIEROLD and PAUL WALTHER. High-resolution scanning electron microscopy of frozen-hydrated and freeze-substituted kidney tissue 375

Rapid Publication

KARL ZIEROLD, MARKUS TOBLER and MARTIN MÜLLER. X-ray microanalysis of high-pressure and impact-frozen erythrocytes RP1

Part 3

CH. LANTUÉJOUL. Ergodicity and integral range 387

D. KÖNIG, S. CARVAJAL-GONZALEZ, A. M. DOWNS, J. VASSY and J. P. RIGAUT. Modelling and analysis of 3-D arrangements of particles by point processes with

examples of application to biological data obtained by confocal scanning light microscopy 405

ZHAOHUA CHANG and JOHN G. BAUST. Ultra-rapid freezing by spraying/plunging: pre-cooling in the cold gaseous layer 435

R. GARY KIRK, LAURA KNOFF and PING LEE. Surfaces of cryosections: is cryosectioning 'cutting' or 'fracturing'? 445

KEIICHI TANAKA, AKIRA MITSUSHIMA, NOBORU YAMAGATA, YUZURU KASHIMA and HISAO TAKAYAMA. Direct visualization of colloidal gold-bound molecules and a cell-surface receptor by ultrahigh-resolution scanning electron microscopy 455

KUNIO SHINOHARA and ATSUSHI ITO. Radiation damage in soft X-ray microscopy of live mammalian cells 463

M. G. HETHERINGTON and M. K. MILLER. The characterization of microstructures in the atom probe. I. Bernoulli sequences 473

M. G. HETHERINGTON and M. K. MILLER. The characterization of microstructures in the atom probe. II. Markov sequences 485

Short Technical Notes

ANN P. BRITTON, YOUNG S. MOON and BASIL HO YUEN. A simple handling technique for mammalian oocytes and embryos during preparation for transmission electron microscopy 497

EBERHARD FRITZ. The use of adhesive-coated grids for the X-ray microanalysis of dry-cut sections in the TEM 501

Book Reviews 505
